### AUTOMATIC TEST SYSTEMS

Automated parameter extraction for ultrasonic flaw analysis p93
Classification of partial discharge sources in gas-insulated substations using novel preprocessing strategies p17
Electrical systems identification using Golay complementary series p267
Fault diagnosis of power transformers: application of fuzzy set theory, expert systems and artificial neural networks p39
Modelling of capacitance tomography sensors p203

### BIOLOGICAL AND BIOMEDICAL SYSTEMS

Adaptive multiresolution analysis based evoked potential filtering p149
Development of micro-optrodes using sol-gel immobilisation p241
Intelligent artefact identification in electroencephalography signal processing p193
Measurement of the magnetic field in the near-field region and self-inductance in free space due to a multiturn square-loop p252

### CABLES AND OVERHEAD LINES

BEM analysis of electric field excited by overhead HV lines erected in built-up areas p81
Circulating current and hysteresis losses in screens, sheaths and armour of electric power cables–mathematical models and comparison with IEC Standard 287 p101
Evaluation of eddy losses due to high current leads in transformers p34
Response of underground multiconductor cable systems to external fields illumination [and reply] p294

### CALIBRATION

High-frequency phase measurement for optical rangefinding system p141
Instrumental delay calibration with zero baseline interferometry for VLBI time comparison p181
UHF couplers for gas-insulated substations: a calibration technique p117

### CIRCUIT BREAKERS

Reliability concept for electric fuses p87

### CIRCUIT CAD

Total TCAD strategy for DFM in IC technology development p63

### CIRCUIT COMPONENTS

Calculation of losses in conductors due to chopped impulse currents, taking the skin effect into account p111
Reliability concept for electric fuses p87

### CIRCUIT THEORY AND DESIGN

Characterisation of radio frequency heating systems in industry using a network analyser p215
Total TCAD strategy for DFM in IC technology development p63

### CODES AND DECODING

Classification of partial discharge sources in gas-insulated substations using novel preprocessing strategies p17
Electrical systems identification using Golay complementary series p267

### COMPUTER APPLICATIONS

Automated parameter extraction for ultrasonic flaw analysis p93
Classification of partial discharge sources in gas-insulated substations using novel preprocessing strategies p17
Dynamic models of certain DC and low frequency electric field sensors p247
Electrical systems identification using Golay complementary series p267
Modelling of capacitance tomography sensors p203
Neural network for representation of hysteresis loops p263
Parameter monitoring using neural-network-processed chromaticity p257
Total TCAD strategy for DFM in IC technology development p63

### CONVERTORS

Analysis of neural and fuzzy-power electronic control p25
Simple voltage generator for producing well-defined nanosecond pulses of amplitudes in excess of 1 kV p229

### CYBERNETICS AND ROBOTICS

Automated parameter extraction for ultrasonic flaw analysis p93
Effects of 'overmakes' on company performance p57

### DATA HANDLING

Classification of partial discharge sources in gas-insulated substations using novel preprocessing strategies p17

### DIELECTRIC MATERIALS AND DEVICES

Experimental investigation of optimum thickness of a piezoelectric element for cantilever actuation p45
Thermally stimulated depolarisation current measurements and interpretation [polymer glass transition studies] p168

### DIGITAL ELECTRONICS

Electrical systems identification using Golay complementary series p267

### DIGITAL FILTERS

Adaptive multiresolution analysis based evoked potential filtering p149

### ELECTRIC DISCHARGES

Analysis of sphere-rod gaps under standard lightning and switching impulse voltages p11
Classification of partial discharge sources in gas-insulated substations using novel preprocessing strategies p17
Nonlinear fillers in electrical insulation p127
Spark breakdown of sphere gaps stressed by standard impulse voltages p273
Subspecies analysis of partial discharge data from a generator stator conductor p287

### ELECTRO-OPTICAL DEVICES

Parameter monitoring using neural-network-processed chromaticity p257

### ELECTROMAGNETIC THEORY

Field measurements study into the potential effects of ISM emissions on cellular radio equipment p134
Response of underground multiconductor cable systems to external fields illumination [and reply] p294

### ELECTROMAGNETISM

BEM analysis of electric field excited by overhead HV lines erected in built-up areas p81
Capacitance and charge distribution of two cylindrical conductors of finite length p280
Dwight-Bewley paradox [comment] p53
Dwight-Bewley paradox [comment and reply] p54
Electrostatic image method for the anisotropic half space p156
Evaluation of eddy losses due to high current leads in transformers p34
Images in linearly conducting dielectrics p163
Origin, location, magnitude and consequences of recoil in the plasma armature railgun [comment and reply] p49

### ELECTRON TUBES

Field measurements study into the potential effects of ISM emissions on cellular radio equipment p134

### ELECTRIC VARIABLES CONTROL

Analysis of neural and fuzzy-power electronic control p25

### ELECTRONIC CIRCUITS

Effects of 'overmakes' on company performance p57

### EXPERT SYSTEMS

Automated parameter extraction for ultrasonic flaw analysis p93
Classification of partial discharge sources in gas-insulated substations using novel preprocessing strategies p17
Fault diagnosis of power transformers: application of fuzzy set theory, expert systems and artificial neural networks p39
Intelligent artefact identification in electroencephalography signal processing p193

### FIBRE OPTICS

Development of micro-optrodes using sol-gel immobilisation p241
Optimisation of signal-to-noise ratio in an optical current measurement system using different detection schemes p175

### FORMAL LOGIC

Fault diagnosis of power transformers: application of fuzzy set theory, expert systems and artificial neural networks p39

### FUZZY CONTROL

Analysis of neural and fuzzy-power electronic control p25

### GENERATORS

Subspecies analysis of partial discharge data from a generator stator conductor p287

### INDUCTION MOTORS

Electrical characterisation of domestic refrigeration compressors p123

### INFORMATION THEORY

Adaptive multiresolution analysis based evoked potential filtering p149
Data fusion and artificial neural networks for biomass estimation p69
Intelligent artefact identification in electroencephalography signal processing p193

### INSTRUMENTATION AND MEASUREMENT

Characterisation of radio frequency heating systems in industry using a network analyser p215
Development of micro-optrodes using sol-gel immobilisation p241
Dynamic models of certain DC and low frequency electric field sensors p247
Electrical characterisation of domestic refrigeration compressors p123
Modelling of capacitance tomography sensors p203
Optimisation of signal-to-noise ratio in an optical current measurement system using different detection schemes p175
Parameter monitoring using neural-network-processed chromaticity p257
Simple voltage generator for producing well-defined nanosecond pulses of amplitudes in excess of 1 kV p229

### INSULATORS AND INSULATION

Nonlinear fillers in electrical insulation p127

### INTEGRATED CIRCUITS

Total TCAD strategy for DFM in IC technology development p63

### INTERFERENCE SUPPRESSION

Field measurements study into the potential effects of ISM emissions on cellular radio equipment p134

### LASERS

High-frequency phase measurement for optical rangefinding system p141

### LINEAR NETWORK ANALYSIS

Circuit properties of coils p234
Indirect boundary integral equation method as applied for wave propagation in the stator winding of an electric machine p223

### MATERIALS AND MATERIALS TESTING

Automated parameter extraction for ultrasonic flaw analysis p93

### MATHEMATICAL TECHNIQUES

Capacitance and charge distribution of two cylindrical conductors of finite length p280
Dynamic models of certain DC and low frequency electric field sensors p247
Electrostatic image method for the anisotropic half space p156
Fault diagnosis of power transformers: application of fuzzy set theory, expert systems and artificial neural networks p39
Total TCAD strategy for DFM in IC technology development p63

### MEASUREMENT OF SPECIFIC VARIABLES

Analysis of sphere-rod gaps under standard lightning and switching impulse voltages p11
Development of micro-optrodes using sol-gel immobilisation p241
Dynamic models of certain DC and low frequency electric field sensors p247
High-frequency phase measurement for optical rangefinding system p141
Instrumental delay calibration with zero baseline interferometry for VLBI time comparison p181
Measurement of the magnetic field in the near-field region and self-inductance in free space due to a multiturn square-loop p252
Modelling of capacitance tomography sensors p203
Optimisation of signal-to-noise ratio in an optical current measurement system using different detection schemes p175
Parameter monitoring using neural-network-processed chromaticity p257
Spark breakdown of sphere gaps stressed by standard impulse voltages p273

### MEASUREMENT SCIENCE

Analysis of sphere-rod gaps under standard lightning and switching impulse voltages p11
Instrumental delay calibration with zero baseline interferometry for VLBI time comparison p181
Spark breakdown of sphere gaps stressed by standard impulse voltages p273
UHF couplers for gas-insulated substations: a calibration technique p117

### MICROWAVE MEASUREMENT TECHNIQUES

UHF couplers for gas-insulated substations: a calibration technique p117

### MODULATION

Optimisation of signal-to-noise ratio in an optical current measurement system using different detection schemes p175

### NEURAL NETS

Analysis of neural and fuzzy-power electronic control p25
Automated parameter extraction for ultrasonic flaw analysis p93
Binary encoded 2nd-differential spectrometry using UV-Vis spectral data and neural networks in the estimation of species type and concentration p73
Classification of partial discharge sources in gas-insulated substations using novel preprocessing strategies p17
Data fusion and artificial neural networks for biomass estimation p69
Fault diagnosis of power transformers: application of fuzzy set theory, expert systems and artificial neural networks p39
Intelligent artefact identification in electroencephalography signal processing p193
Neural network for representation of hysteresis loops p263
Parameter monitoring using neural-network-processed chromaticity p257

### NONELECTRIC VARIABLES CONTROL

Binary encoded 2nd-differential spectrometry using UV-Vis spectral data and neural networks in the estimation of species type and concentration p73
Data fusion and artificial neural networks for biomass estimation p69

### NONLINEAR CONTROL SYSTEMS

Analysis of neural and fuzzy-power electronic control p25

### NUMERICAL ANALYSIS

Adaptive multiresolution analysis based evoked potential filtering p149
BEM analysis of electric field excited by overhead HV lines erected in built-up areas p81
Capacitance and charge distribution of two cylindrical conductors of finite length p280
Evaluation of eddy losses due to high current leads in transformers p34
Indirect boundary integral equation method as applied for wave propagation in the stator winding of an electric machine p223

### OPTICAL IMAGE PROCESSING

Automated parameter extraction for ultrasonic flaw analysis p93
Classification of partial discharge sources in gas-insulated substations using novel preprocessing strategies p17
Intelligent artefact identification in electroencephalography signal processing p193
Modelling of capacitance tomography sensors p203

### OPTICAL MATERIALS AND DEVICES

Development of micro-optrodes using sol-gel immobilisation p241
Optimisation of signal-to-noise ratio in an optical current measurement system using different detection schemes p175
Parameter monitoring using neural-network-processed chromaticity p257

### OPTICAL RADAR

High-frequency phase measurement for optical rangefinding system p141

### OPTICAL SPECTROSCOPY

Binary encoded 2nd-differential spectrometry using UV-Vis spectral data and neural networks in the estimation of species type and concentration p73

### PATTERN RECOGNITION

Automated parameter extraction for ultrasonic flaw analysis p93
Binary encoded 2nd-differential spectrometry using UV-Vis spectral data and neural networks in the estimation of species type and concentration p73
Classification of partial discharge sources in gas-insulated substations using novel preprocessing strategies p17
Data fusion and artificial neural networks for biomass estimation p69
Intelligent artefact identification in electroencephalography signal processing p193

### POWER ELECTRONICS

Analysis of neural and fuzzy-power electronic control p25

### POWER ENGINEERING COMPUTING

BEM analysis of electric field excited by overhead HV lines erected in built-up areas p81
Classification of partial discharge sources in gas-insulated substations using novel preprocessing strategies p17
Fault diagnosis of power transformers: application of fuzzy set theory, expert systems and artificial neural networks p39

### POWER SYSTEM CONTROL

Analysis of neural and fuzzy-power electronic control p25
Fault diagnosis of power transformers: application of fuzzy set theory, expert systems and artificial neural networks p39

### POWER SYSTEM PROTECTION

Analysis of sphere-rod gaps under standard lightning and switching impulse voltages p11
Behaviour of positive conductor-rod gaps stressed by impulse voltages in atmospheric air p209
Calculation of losses in conductors due to chopped impulse currents, taking the skin effect into account p111
Review of claimed enhanced lightning protection of buildings by early streamer emission air terminals p1

### POWER SYSTEMS AND APPLICATIONS

Analysis of neural and fuzzy-power electronic control p25
Characterisation of radio frequency heating systems in industry using a network analyser p215
Electrical characterisation of domestic refrigeration compressors p123
Field measurements study into the potential effects of ISM emissions on cellular radio equipment p134

### POWER SYSTEMS AND PLANTS

Analysis of neural and fuzzy-power electronic control p25
Characterisation of radio frequency heating systems in industry using a network analyser p215
Classification of partial discharge sources in gas-insulated substations using novel preprocessing strategies p17
Electrical characterisation of domestic refrigeration compressors p123
Experimental investigation of optimum thickness of a piezoelectric element for cantilever actuation p45
Field measurements study into the potential effects of ISM emissions on cellular radio equipment p134
Indirect boundary integral equation method as applied for wave propagation in the stator winding of an electric machine p223
UHF couplers for gas-insulated substations: a calibration technique p117

### POWER TRANSMISSION AND DISTRIBUTION

Response of underground multiconductor cable systems to external fields illumination [and reply] p294

### PROBABILITY AND STATISTICS

Subspecies analysis of partial discharge data from a generator stator conductor p287
Total TCAD strategy for DFM in IC technology development p63

### PRODUCTION ENGINEERING

Automated parameter extraction for ultrasonic flaw analysis p93
Effects of 'overmakes' on company performance p57
Reliability concept for electric fuses p87
Total TCAD strategy for DFM in IC technology development p63

### RADAR AND RADIONAVIGATION

Instrumental delay calibration with zero baseline interferometry for VLBI time comparison p181

### RADIO SYSTEMS

Field measurements study into the potential effects of ISM emissions on cellular radio equipment p134

### SIGNAL GENERATORS

Simple voltage generator for producing well-defined nanosecond pulses of amplitudes in excess of 1 kV p229

### SIGNAL PROCESSING

Adaptive multiresolution analysis based evoked potential filtering p149
Optimisation of signal-to-noise ratio in an optical current measurement system using different detection schemes p175

### SIMULATION, MODELLING AND IDENTIFICATION

Data fusion and artificial neural networks for biomass estimation p69
Modelling of capacitance tomography sensors p203

### SONICS AND ULTRASONICS

Automated parameter extraction for ultrasonic flaw analysis p93

### SWITCHGEAR

Reliability concept for electric fuses p87

### SYSTEMS THEORY

Binary encoded 2nd-differential spectrometry using UV-Vis spectral data and neural networks in the estimation of species type and concentration p73
Data fusion and artificial neural networks for biomass estimation p69
Effects of 'overmakes' on company performance p57

### THIN FILM GROWTH

Development of micro-optrodes using sol-gel immobilisation p241

### TRANSFORMERS

Circuit properties of coils p234
Computational algorithms for linear variable differential transformers (LVDTs) p189
Evaluation of eddy losses due to high current leads in transformers p34
Fault diagnosis of power transformers: application of fuzzy set theory, expert systems and artificial neural networks p39

### WAVEGUIDE COMPONENTS

UHF couplers for gas-insulated substations: a calibration technique p117
